Contents

01 What this app does — overview

02 The top bar — Group/DM, case, amount left, WhatsApp, Donors

03 The group message — write, edit, send

04 Sending a DM — one person at a time

05 Auto — let the app post by itself

06 Talking to the assistant — type instead of click

07 The Donors list — tabs, search, add

08 One donor at a time — DM, status, the ⋯ menu

09 Messaging many donors — bulk paste, Important, All

10 Saved message versions — the Messages tab

11 Volunteers — people who help share the case

12 WhatsApp & the poster — staying connected

13 Settings — theme, AI, DMs

14 Keyboard shortcuts — for desktop

15 A few tips — worth keeping in mind

16 Quick reference — one page to keep open

The Team screen (your own task list) is covered separately. Everything else is here.

01 What this app does

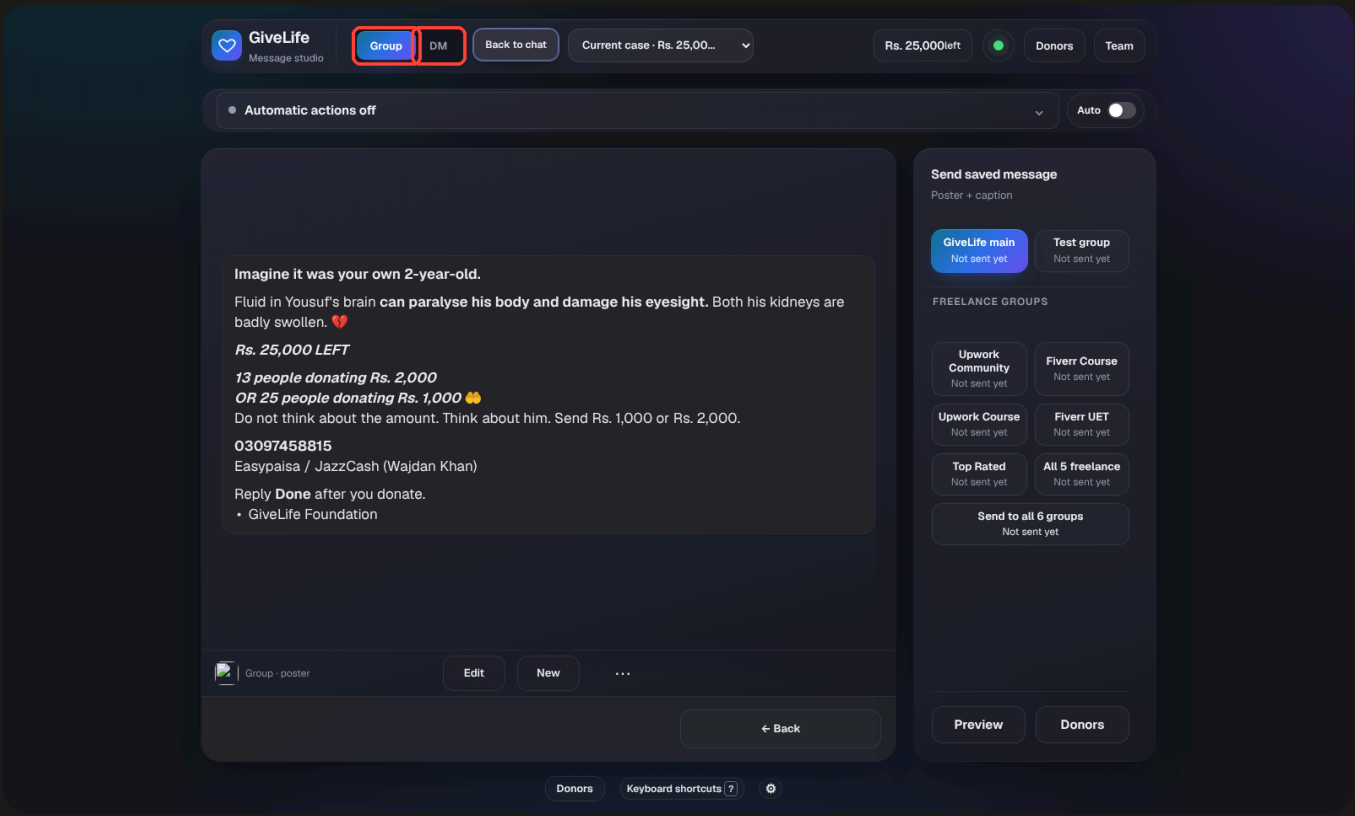

GiveLife Message Studio writes and sends the case message for you, and keeps track of donors.

- **It writes the message** — a fresh version any time, built from the real amount left.
- **It sends it** — to one group, all groups, one donor, or many donors at once.
- **It can post by itself.** Turn Auto on and it keeps going.
- **It remembers your donors** — who's been messaged, who's donated.
- **You can just tell it what to do** — type "25k left" or "send to main" and it does it.

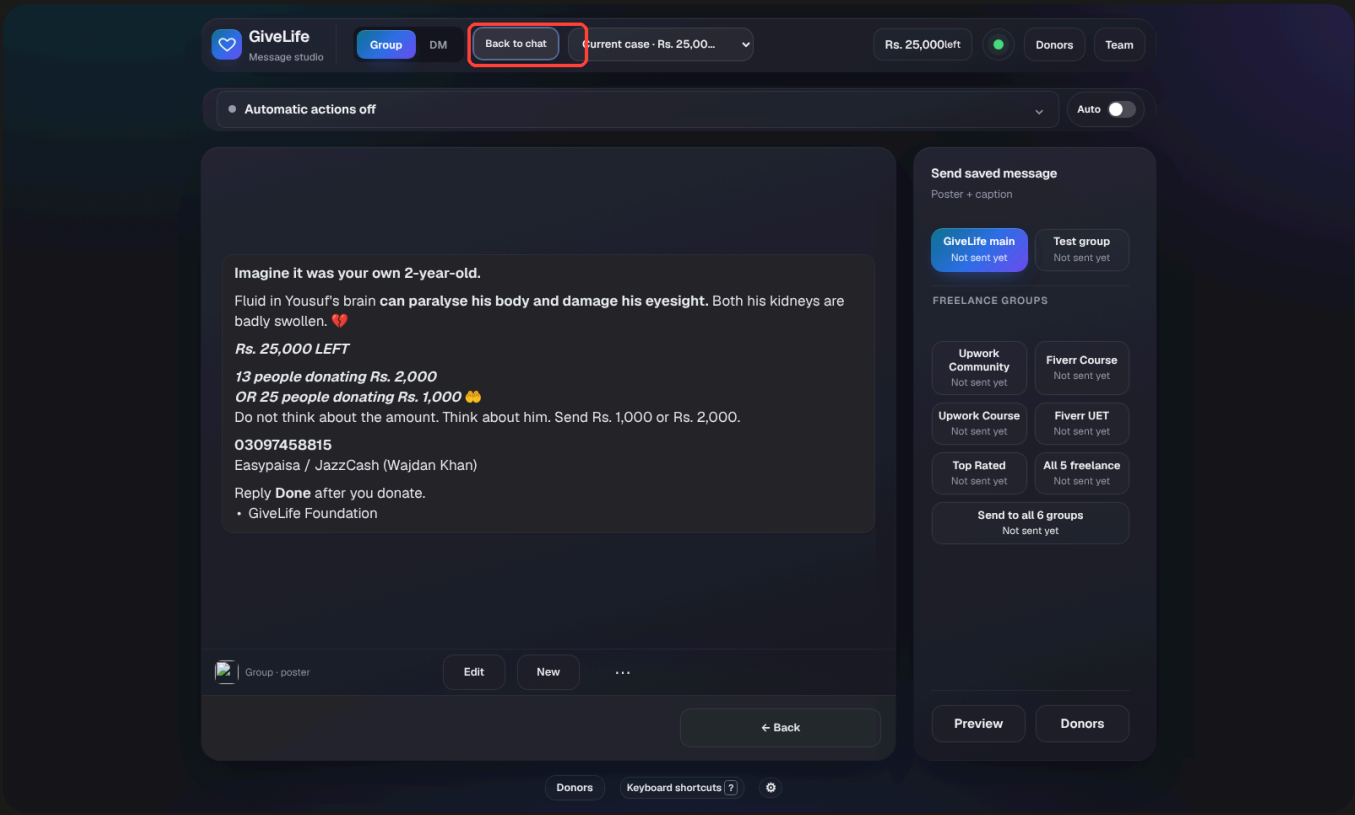

> Everything it sends goes out as a real WhatsApp message, so it's worth a quick glance at the text before you tap send — that's the only thing to keep in mind.

02 The top bar

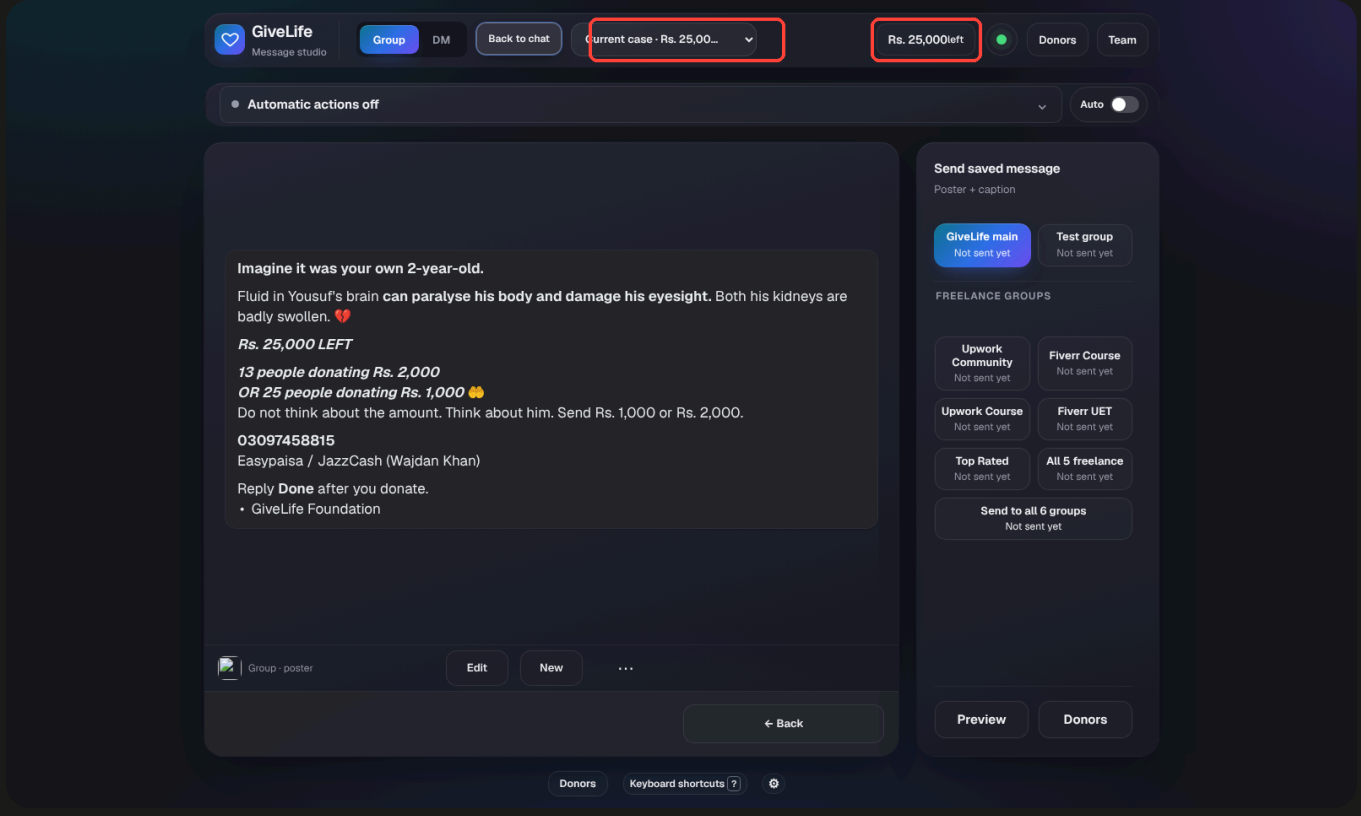

These controls sit at the top of every screen.

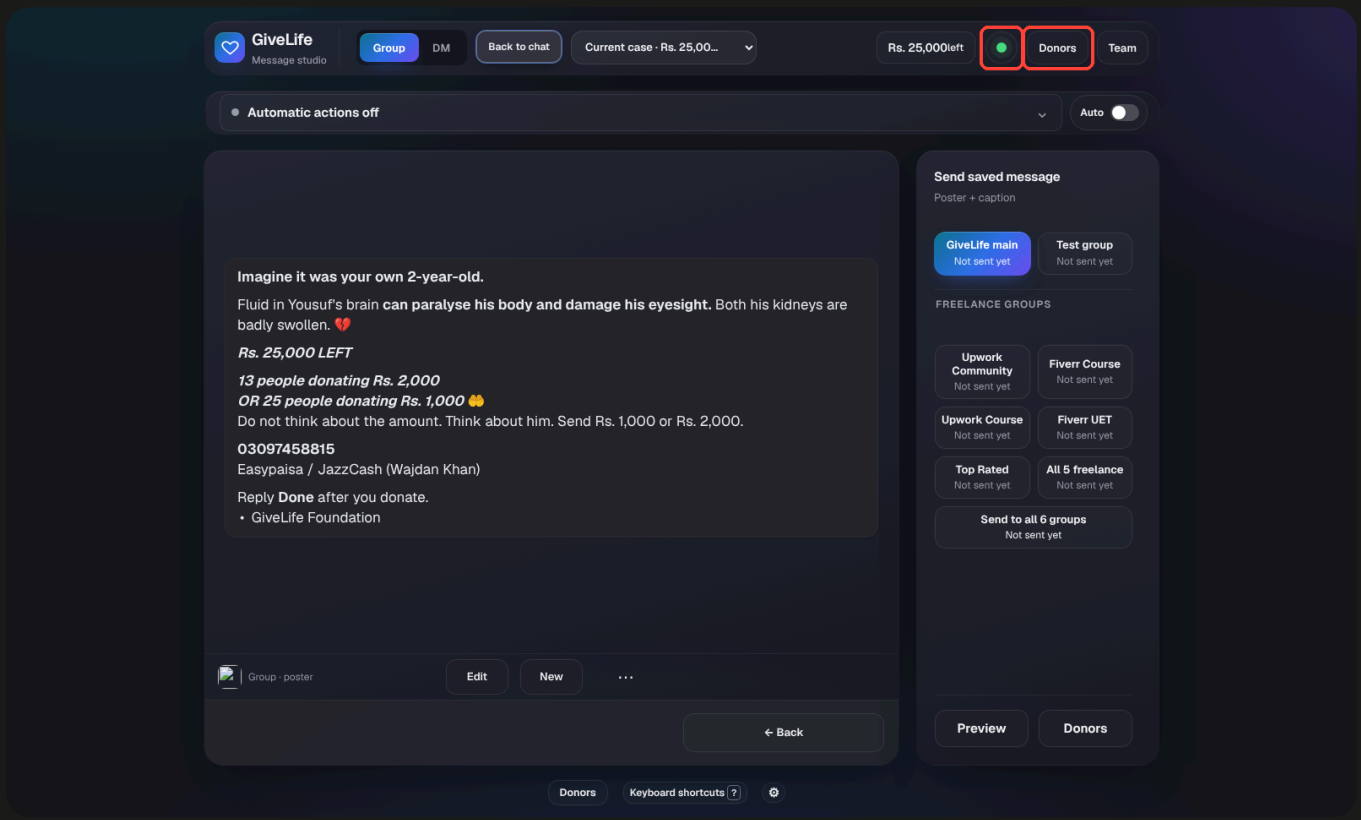

Group / DM switches between the two messages — Group goes to WhatsApp groups, DM is the private one-to-one message. Each is saved separately.

Message preview shows or hides the message text. (On a phone it's called **Show message**.)

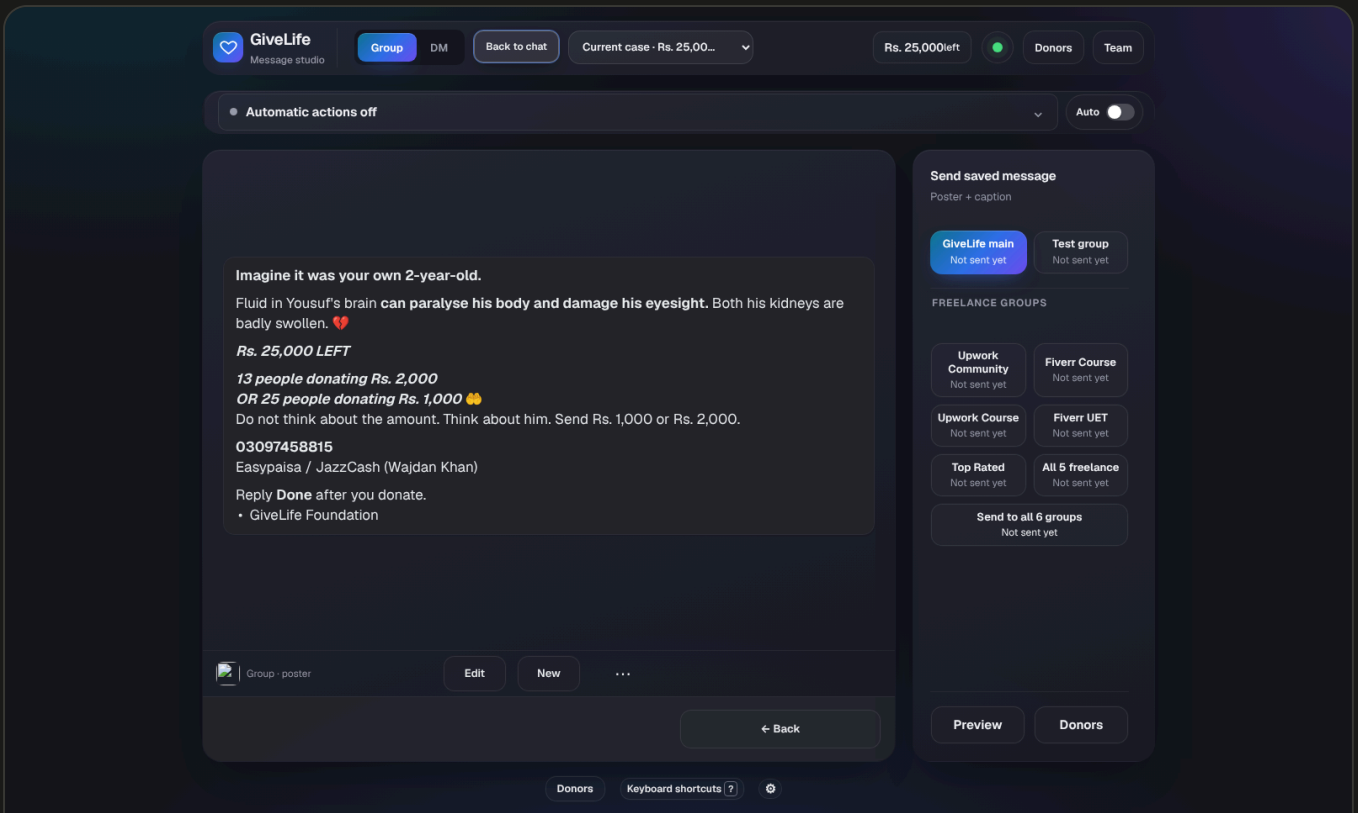

Current case switches, renames, or starts a case. **Rs. … left** is the amount still needed — tap it, or just tell the assistant "25k left" or "came 2000", and the message updates to match.

The dot shows if WhatsApp is connected. **Donors** opens the donor list — also in the footer and, on desktop, as a one-tap shortcut at the bottom.

03 The group message

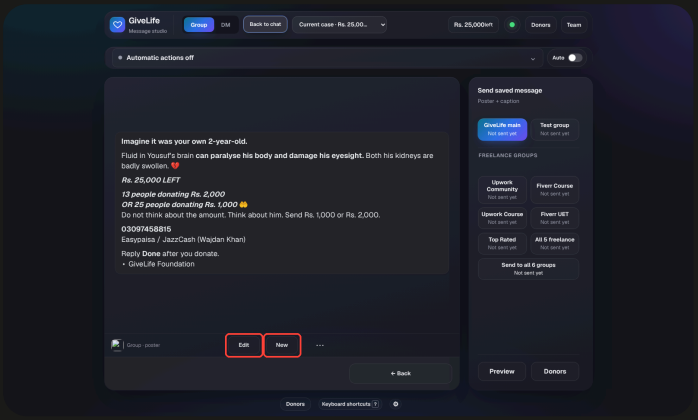

Open **Message preview** to see what will be sent.

The saved group caption, with Edit / New / ⋯ underneath it.

Edit it yourself

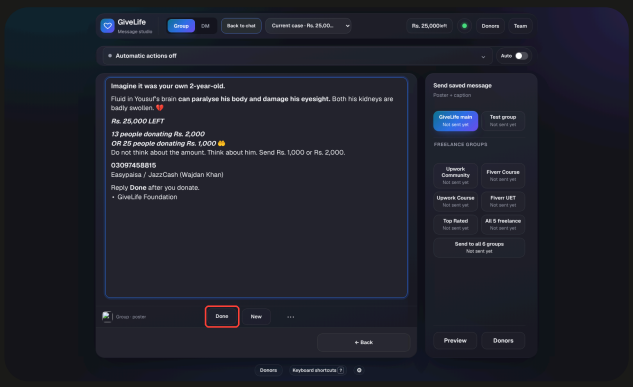

1. Tap **Edit** — the box becomes typeable.
2. Change the text.
3. Tap **Done** to save it.

Or let the app write it

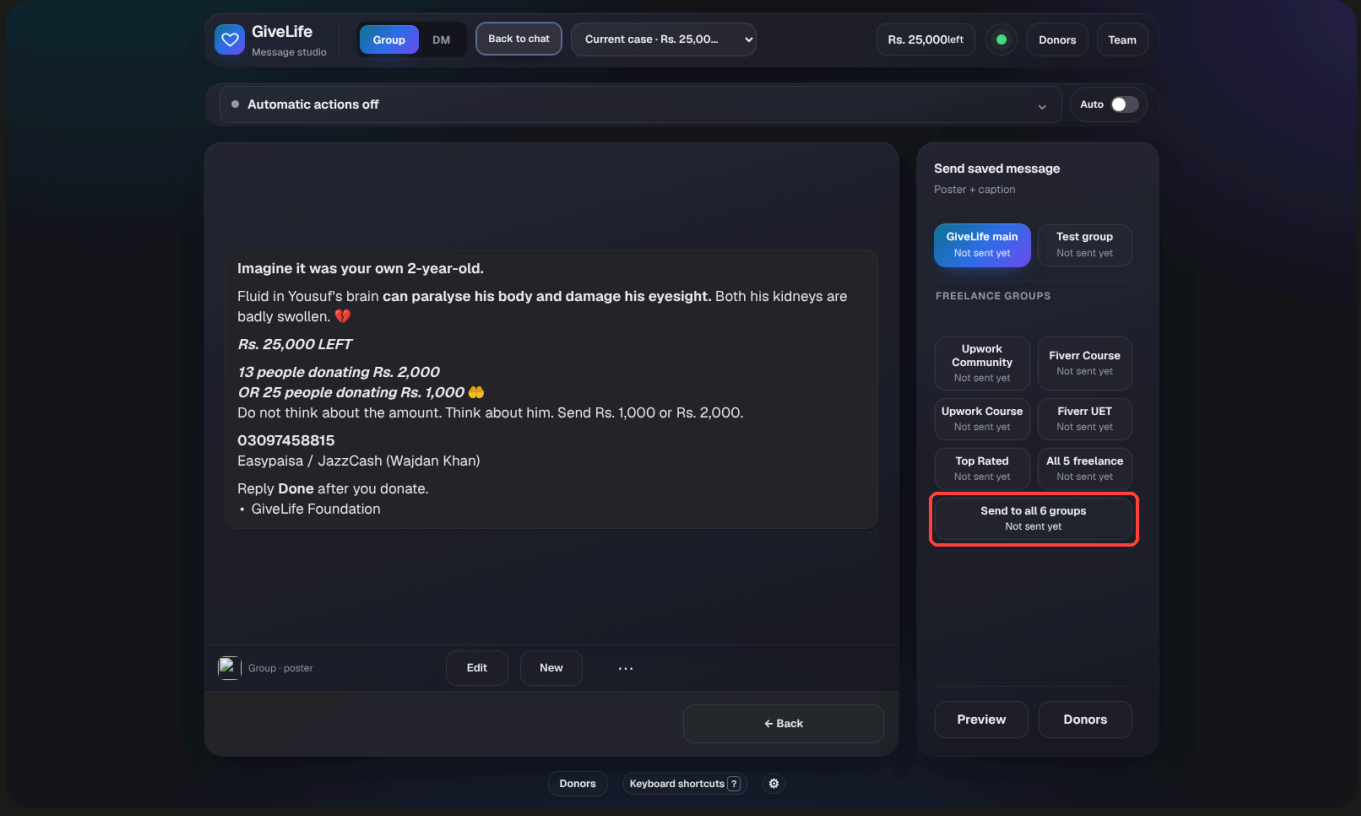

Tap **New** for a different ready-made version — same facts, fresh wording. Good to use before a repeat send.

The ⋯ menu has **Copy message** and **Hide message**.

Sending it

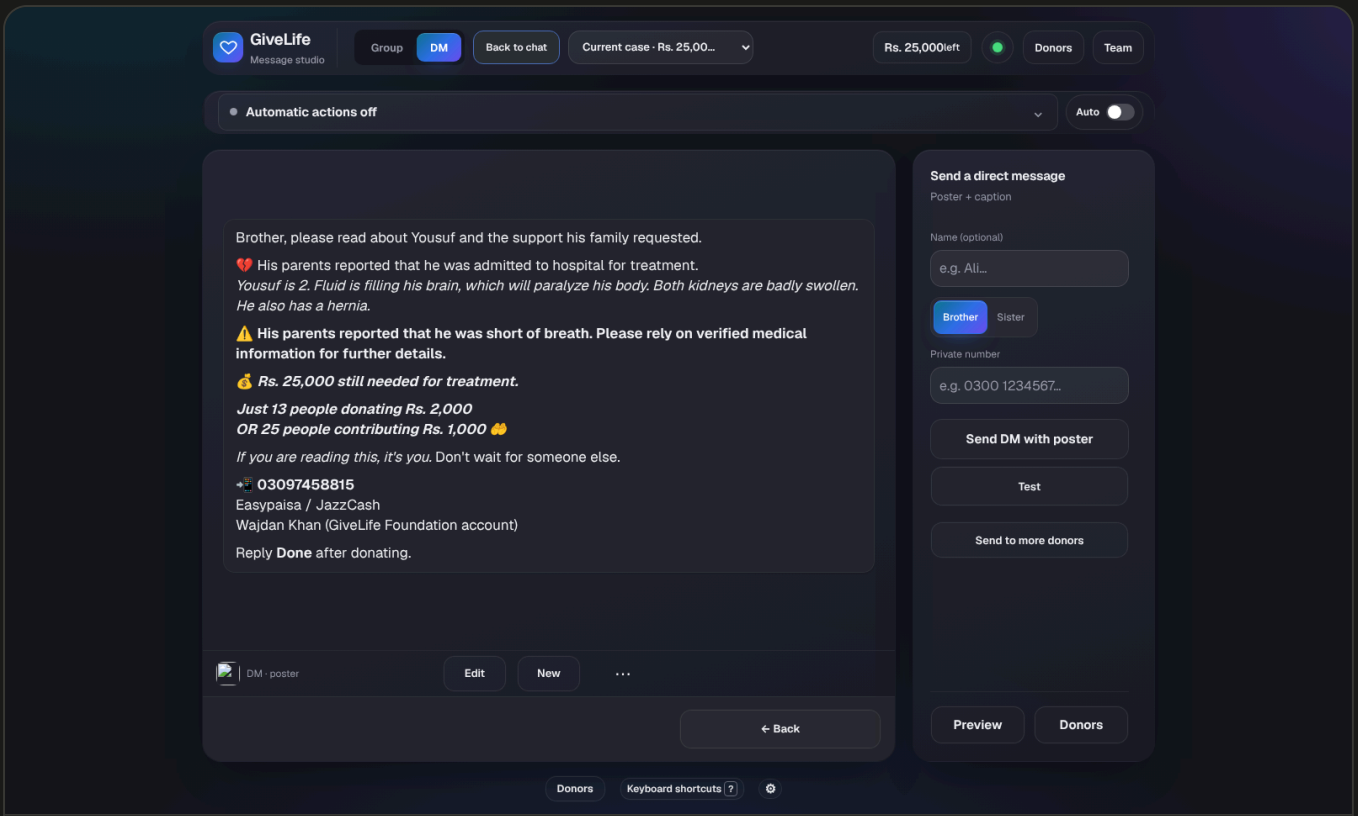

The right-side panel lists every group. **Tap a group's name and it sends right away** — so only tap one once the message on screen looks right.

Send to all N groups sends to every group, one after another. Each tile shows when it was last sent, or **Not sent yet**.

04 Sending a DM

Switch to **DM** at the top — a private message to one person.

The DM caption on the left, the send form on the right.

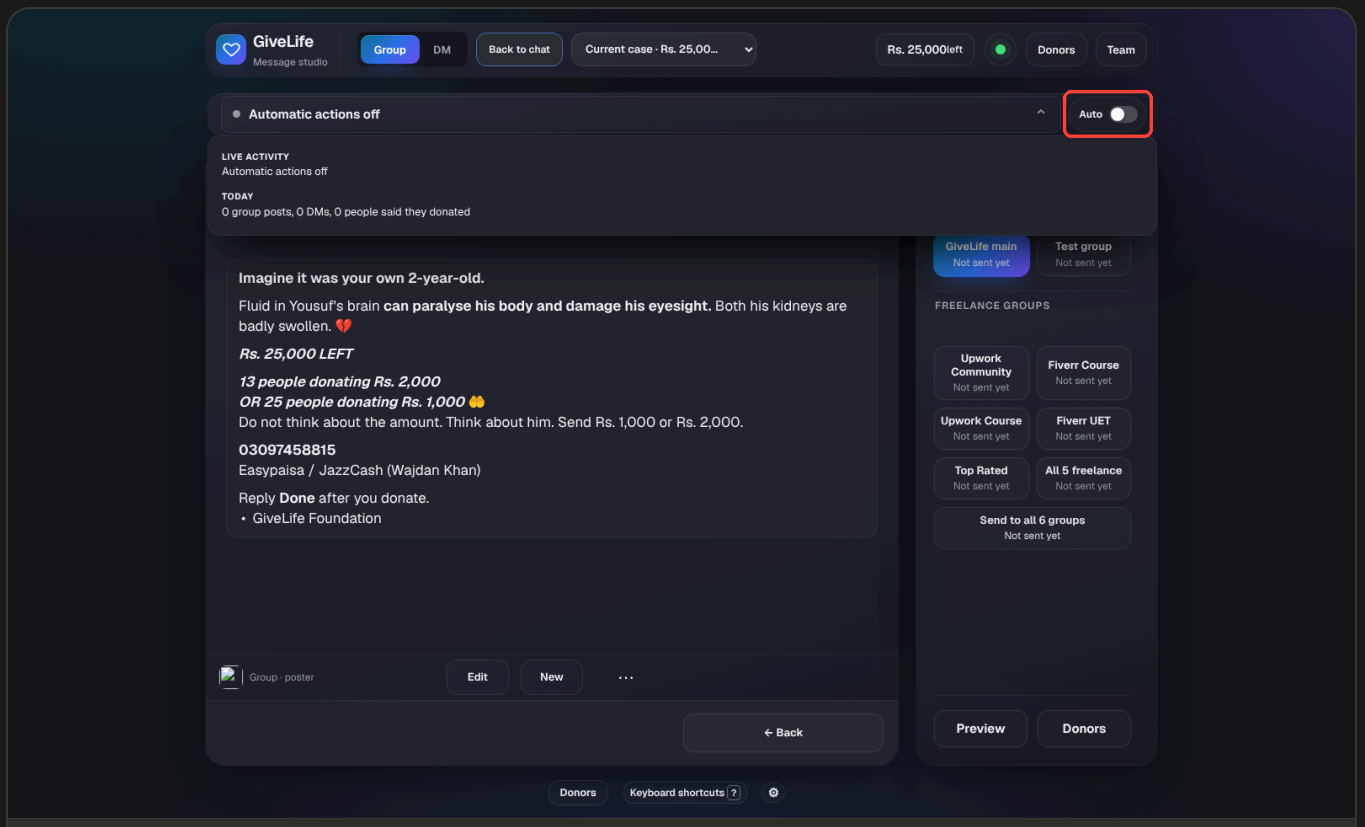

1. **Name (optional).** Used as the greeting — leave blank for "Brother".
2. **Brother / Sister.** Pick whichever fits.
3. **Private number.** Their WhatsApp number.
4. Tap **Send DM with poster**.

Test sends it to the foundation's own test number first, so you can see how it looks. **Send to more donors** opens the paste-numbers box from Section 9.

> For a donor already saved, it's quicker to send from the Donors list (Section 8) — their number is already there.

05 Auto — let the app post by itself

Under the top bar is the **Automatic actions** bar. Switch **Auto** on and it keeps posting to your groups on its own, with natural gaps between posts.

Tap the bar to see what Auto is doing right now, and today's totals.

- The bar shows what's happening — waiting, sending, or paused.
- Tap it to expand: live activity, the next posts due, and today's totals.
- You can still send manually any time — that always goes immediately.
- Turn Auto off to stop it completely.

If the case is closed, WhatsApp is disconnected, or the account is on hold, Auto pauses and the bar explains why.

06 Talking to the assistant

The box at the bottom — `Message GiveLife…` — understands plain English or Roman Urdu. Type what you want and it does it.

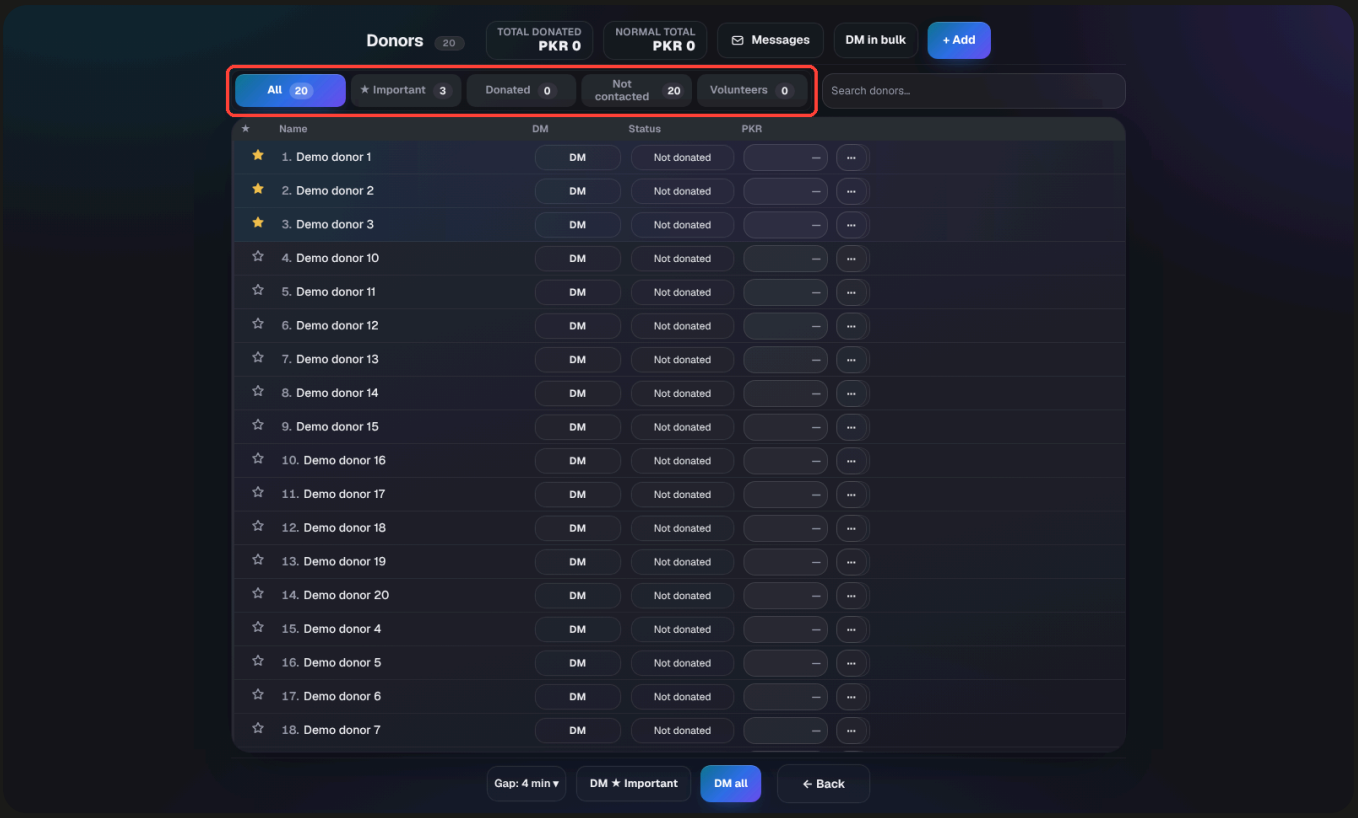

YOU TYPE	WHAT HAPPENS
`25k left`	Updates the amount still needed.
`came 2000`	Records a Rs. 2,000 donation.
`send hi to Ali`	Sends exactly those words to Ali.
`send to main`	Sends the group caption to the main group.
`dm important`	DMs the Important donors, with your usual gap.
`stop`	Pauses a DM batch that's sending.
`hold everything`	Pauses all sending until you say resume.
`3 versions of this` (pasted)	Saves a few rewritten versions to Messages.
`what's scheduled?`	Lists anything queued to send later.

It only acts on what's in your current message — never on old or quoted text. If something's unclear it just asks.

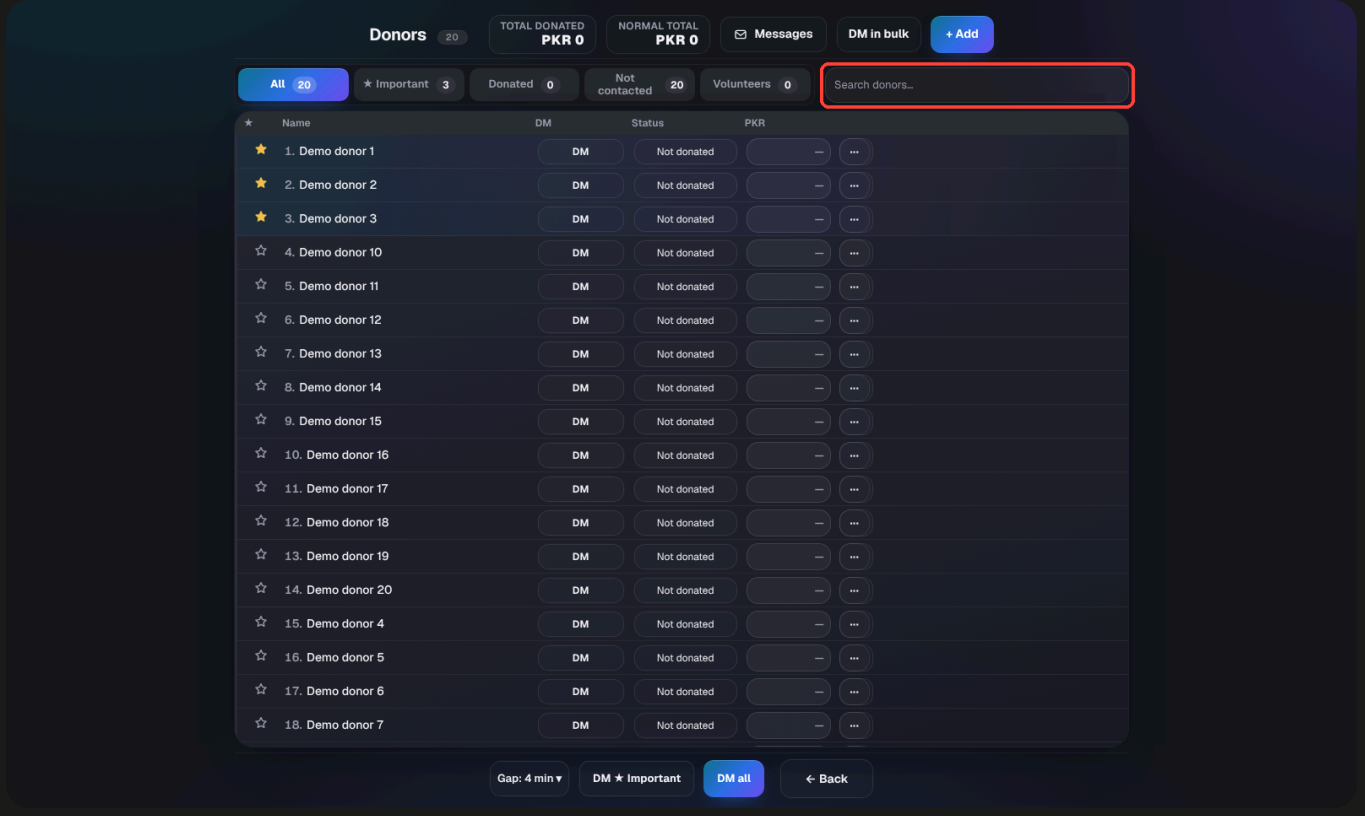

Shortcuts: say `save shortcut morning run: post in main then dm 10 donors`, and after that, typing `morning run` does the whole thing.

07 The Donors list

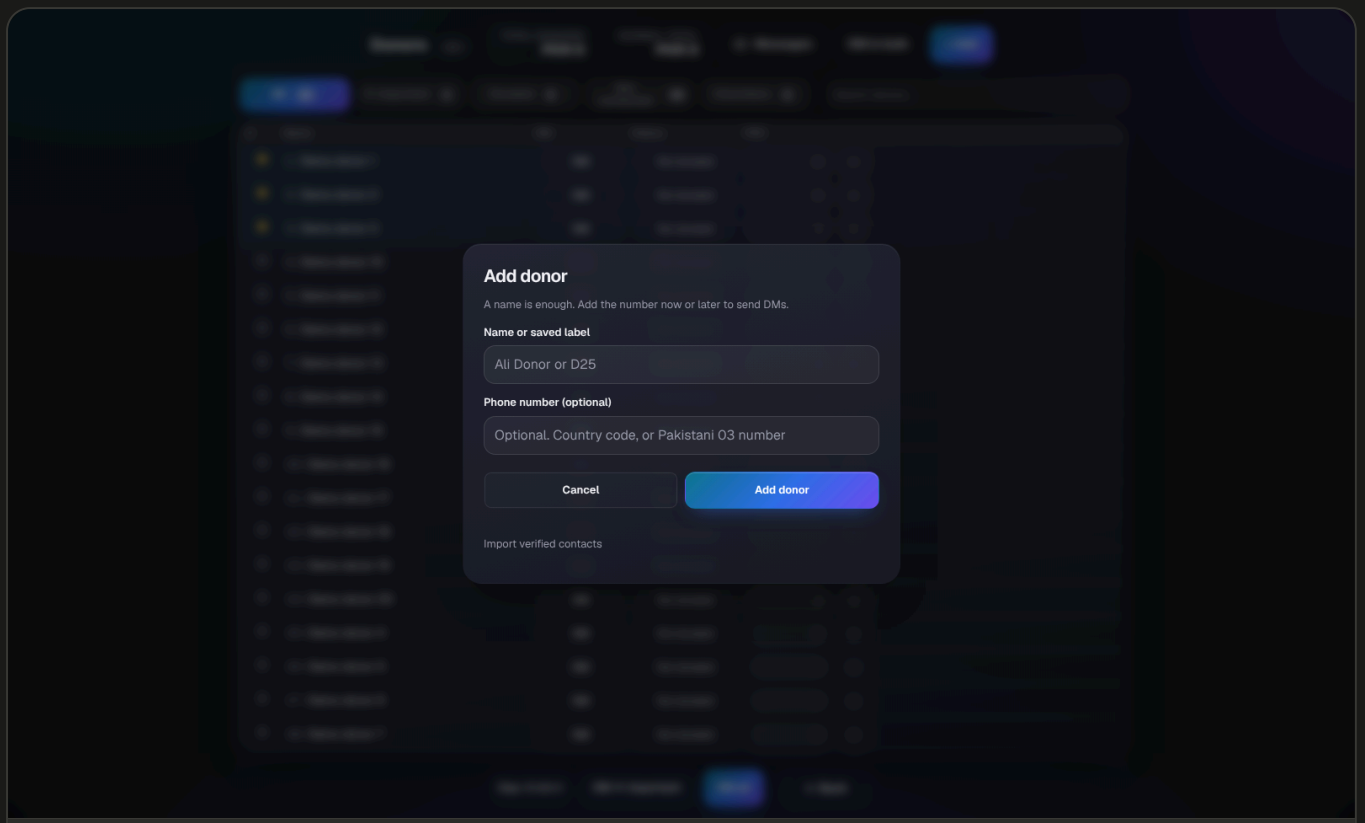

Tap **Donors** to open it.

TAB	SHOWS
All	Every saved donor.
★ Important	Starred donors — tap the star on a row to add or remove it.
Donated	Donors marked as having given.
Not contacted	Never DMed yet.
Volunteers	A separate list — Section 11.

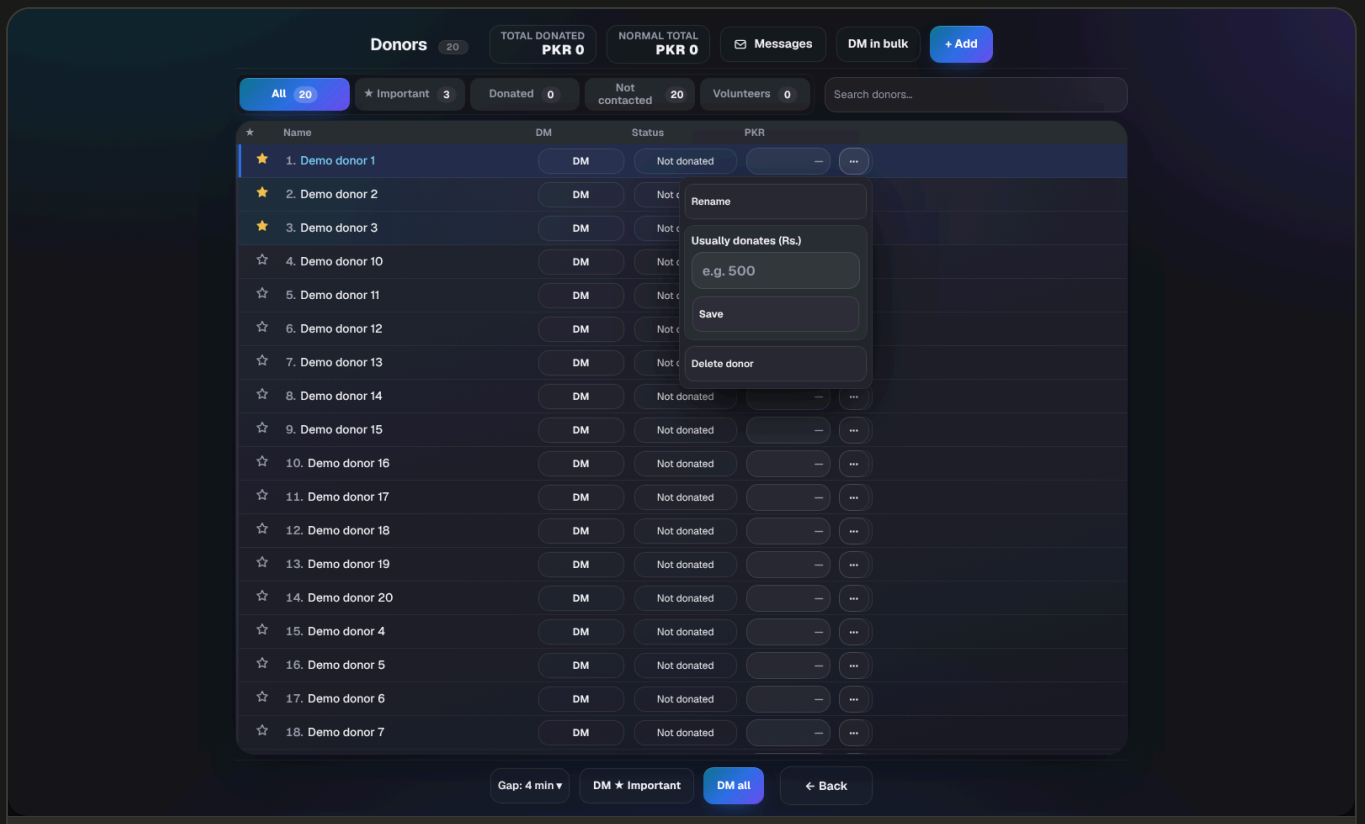

Search filters by name. **+ Add** adds one donor — a name is enough.

Only a name is required when adding a donor.

08 One donor at a time

Each row has four controls.

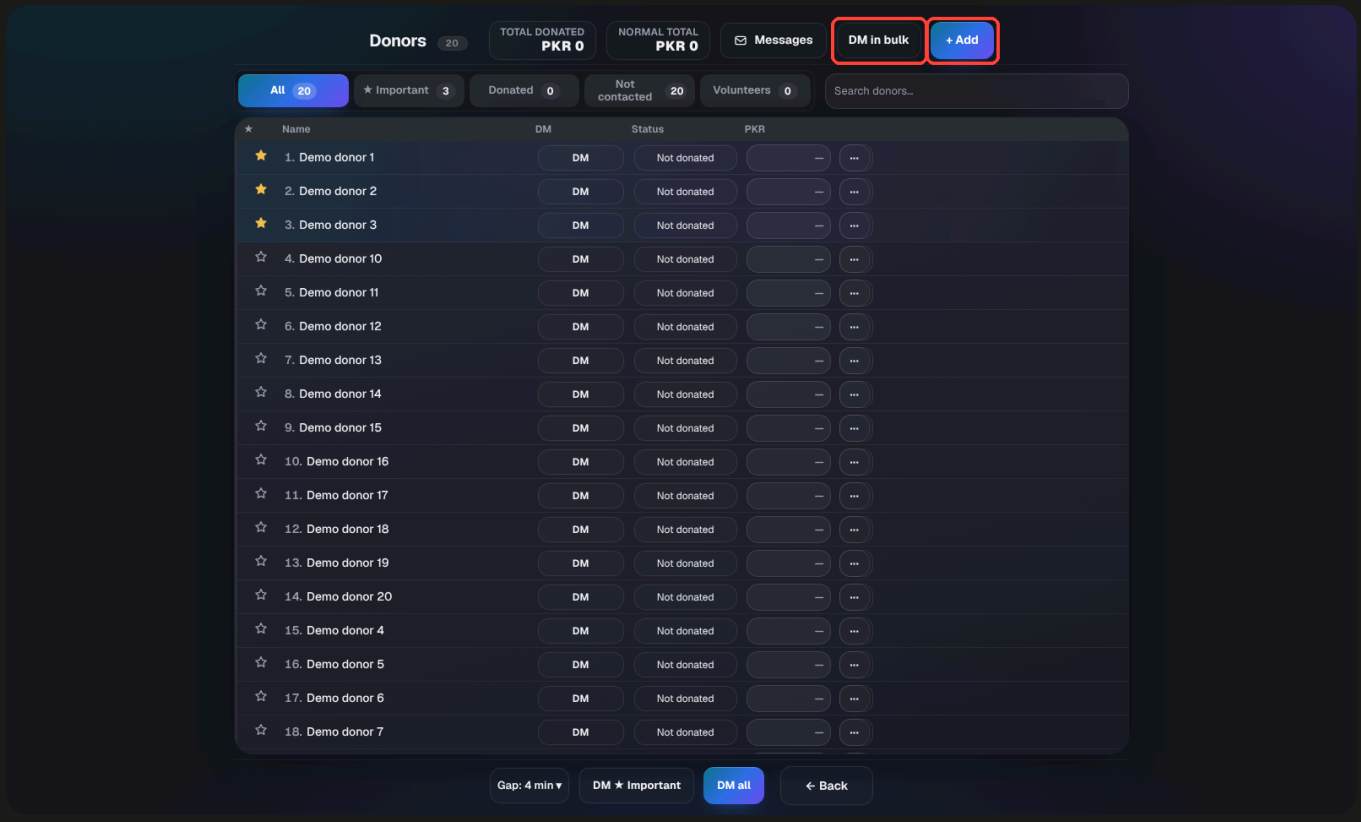

A donor row with its ··· menu open.

CONTROL	WHAT IT DOES
DM	Sends the DM caption to this donor now.
Status	Mark Donated or not — your own record, separate from the amount left.
PKR	The amount this donor gave, if you'd like to note it.
···	**Rename**, **Usually donates** (a personalised line), **Delete donor**.

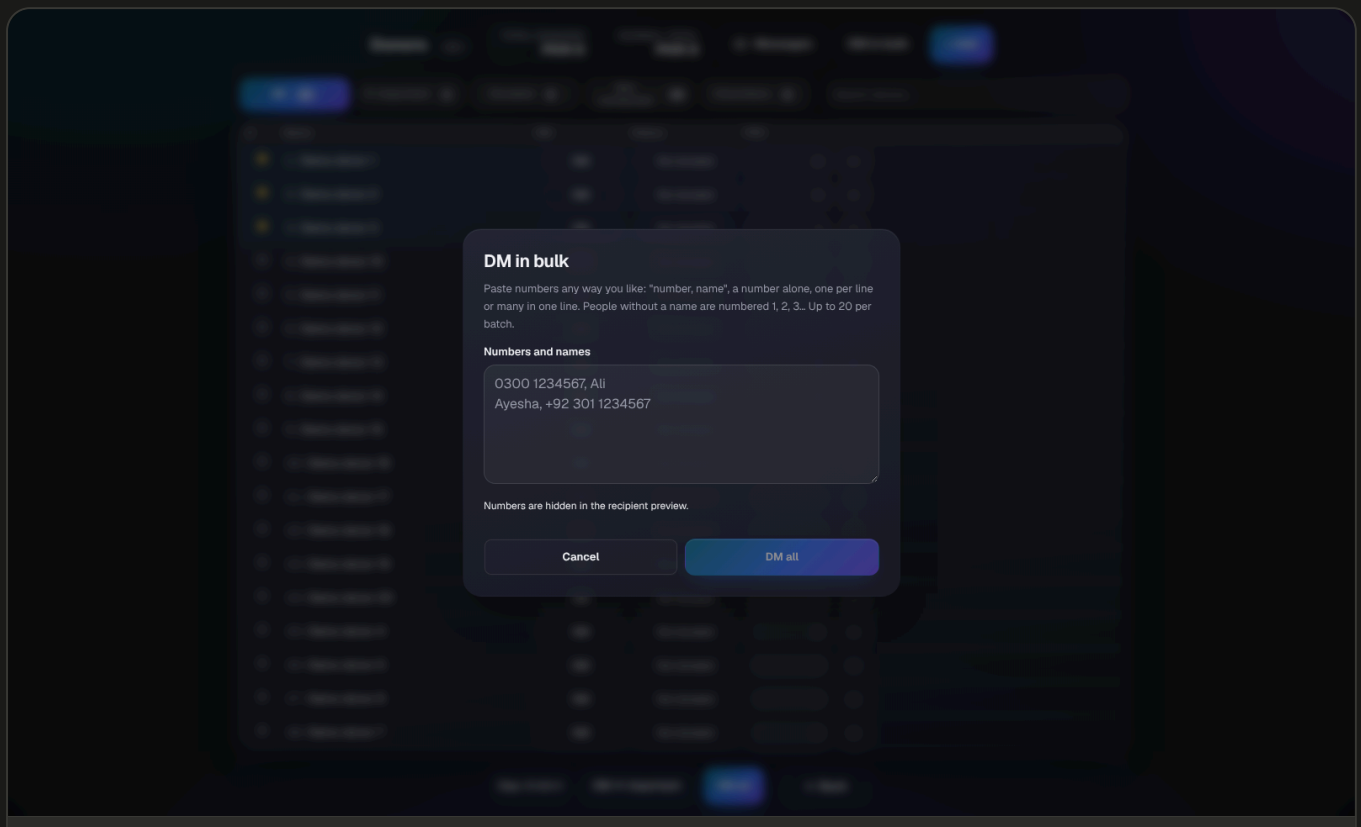

No number saved? The DM button becomes **Add #** — enter it once and DMs work from then on.

09 Messaging many donors

At the bottom of Donors: **Gap: 4 min ▾** **DM ★ Important** **DM all**. These message the whole list, one by one, with a gap between each person. Anyone already DMed is skipped unless you ask again.

DM in bulk, at the top, is for people not yet saved — paste their numbers and it sends to all of them.

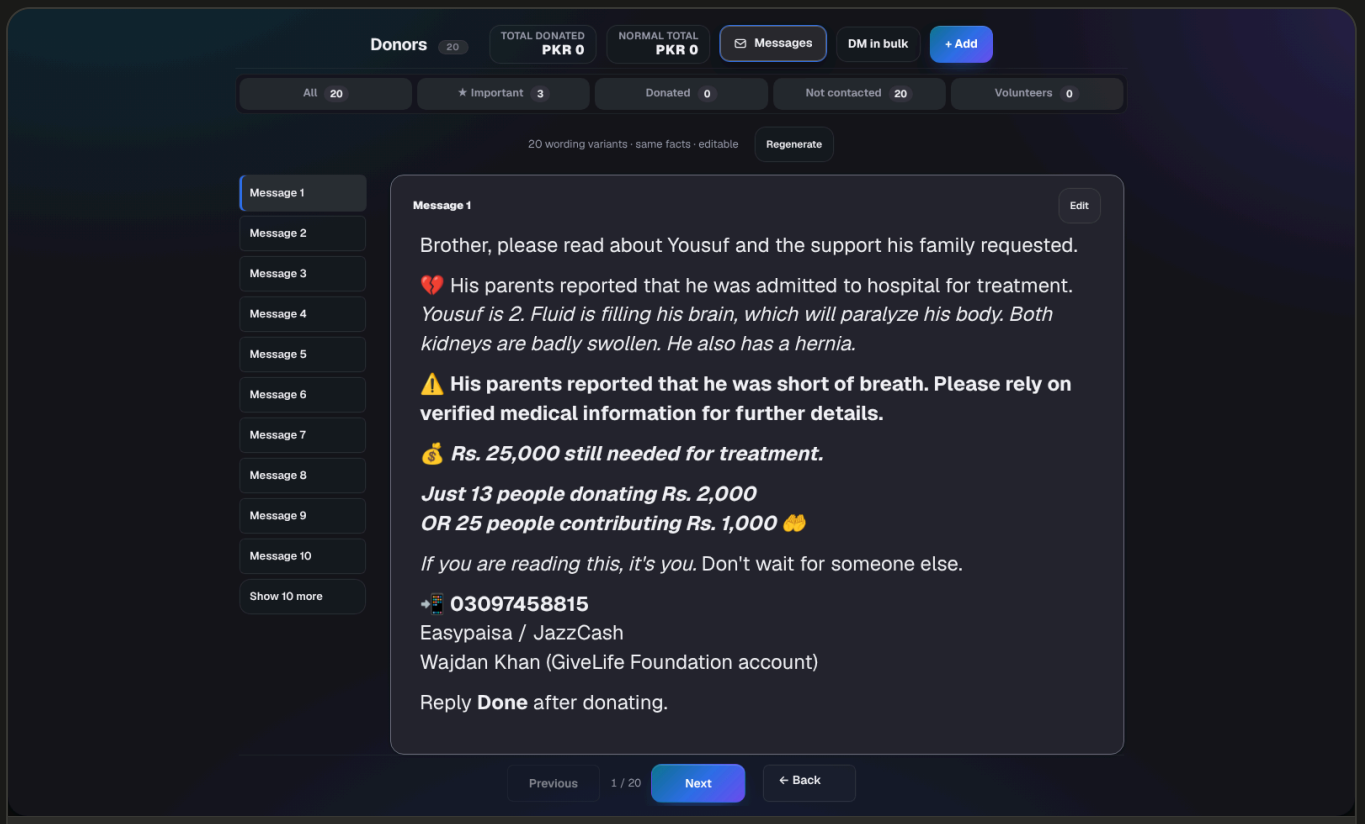

One number per line, names optional. Up to 20 at a time.

A batch keeps going by itself once started. Type "stop" any time to pause it.

10 Saved message versions

Tap **Messages** at the top of Donors — several written versions of a DM, side by side.

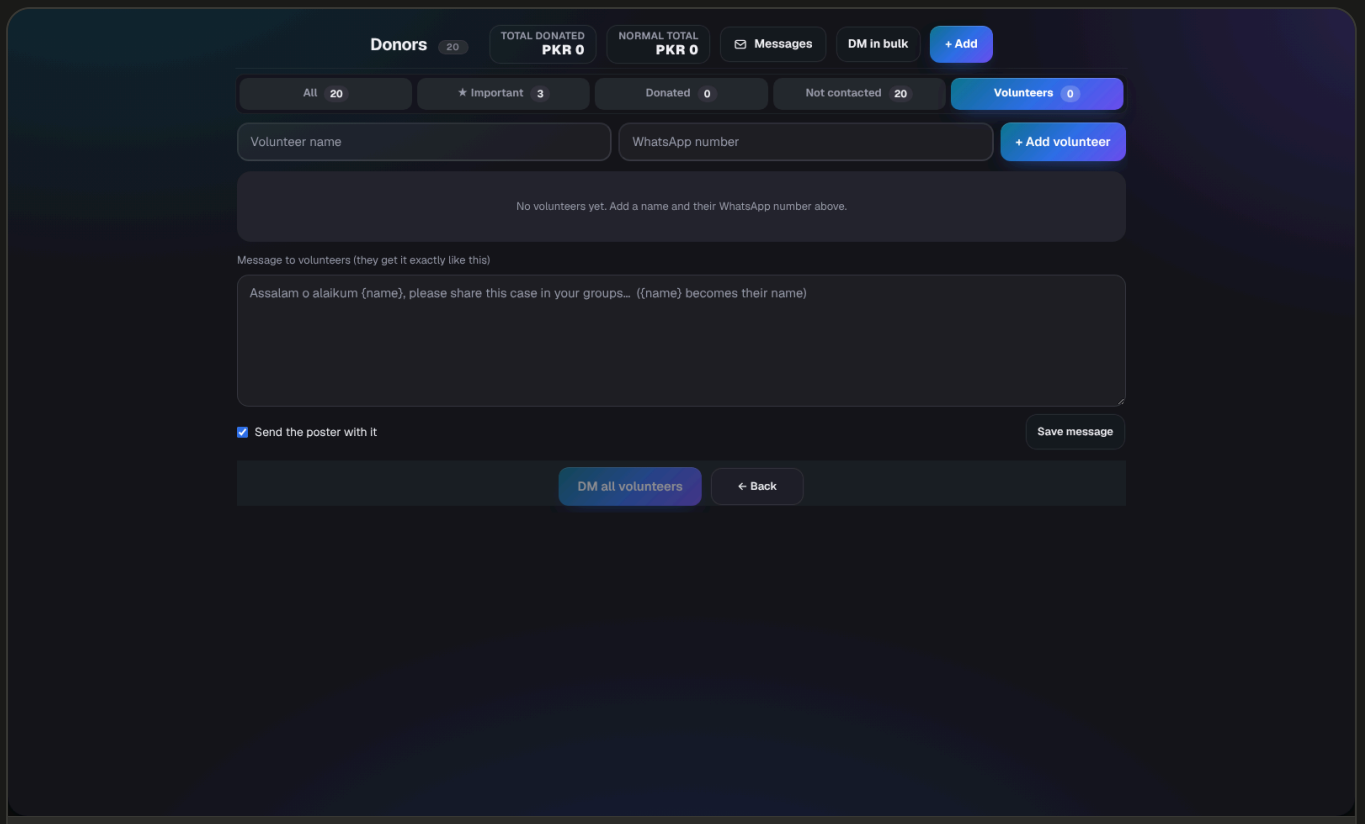

One card per version. Previous / Next pages through them.

Edit any card and save it in place. **Regenerate** writes a fresh set if you'd like to start over.

11 Volunteers

The **Volunteers** tab is a short, separate list — people who help share the case rather than donate.

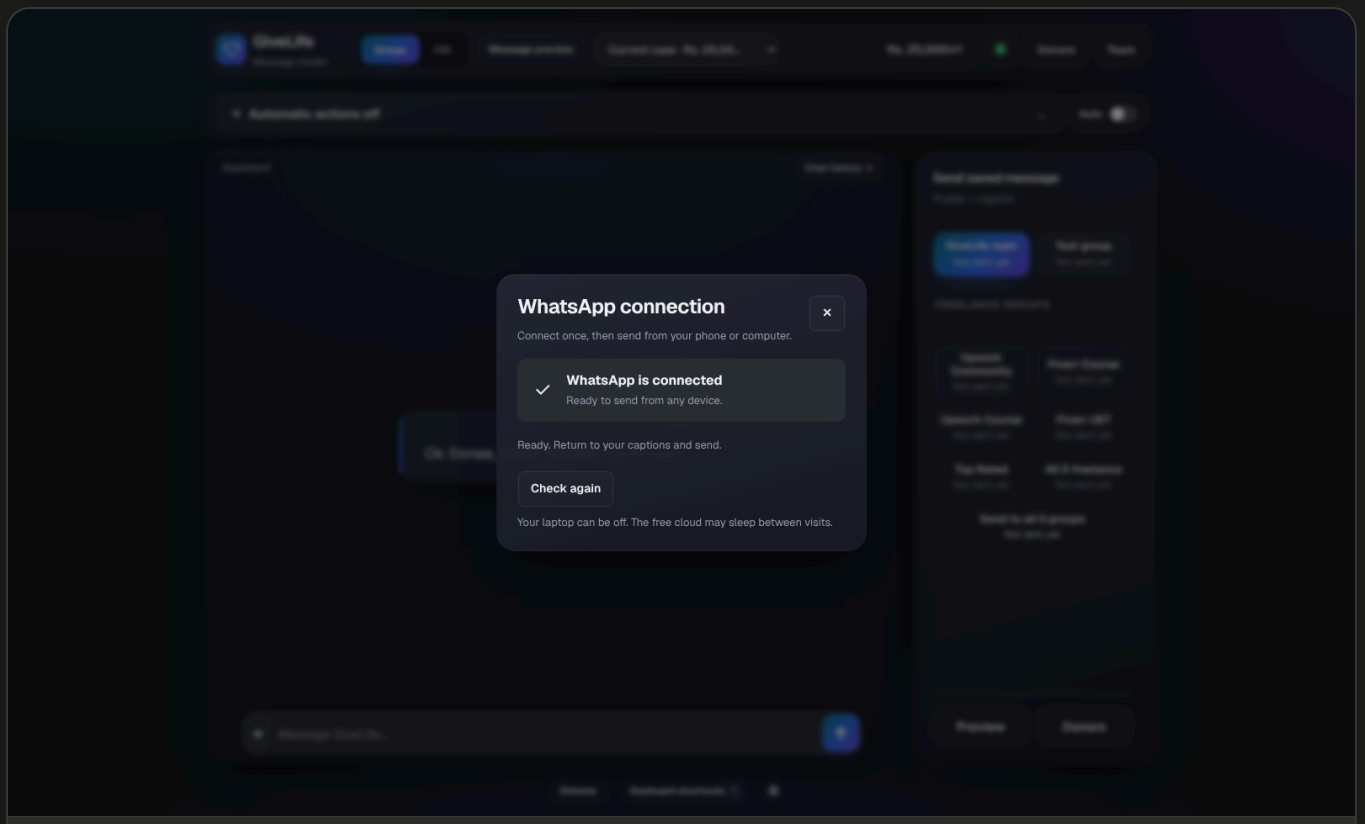

One saved message, sent with each volunteer's first name filled in.

Add a name and number, write one message (`{name}` becomes their first name), then send it to one volunteer or everyone.

12 WhatsApp & the poster

Tap the dot in the top bar to open this screen.

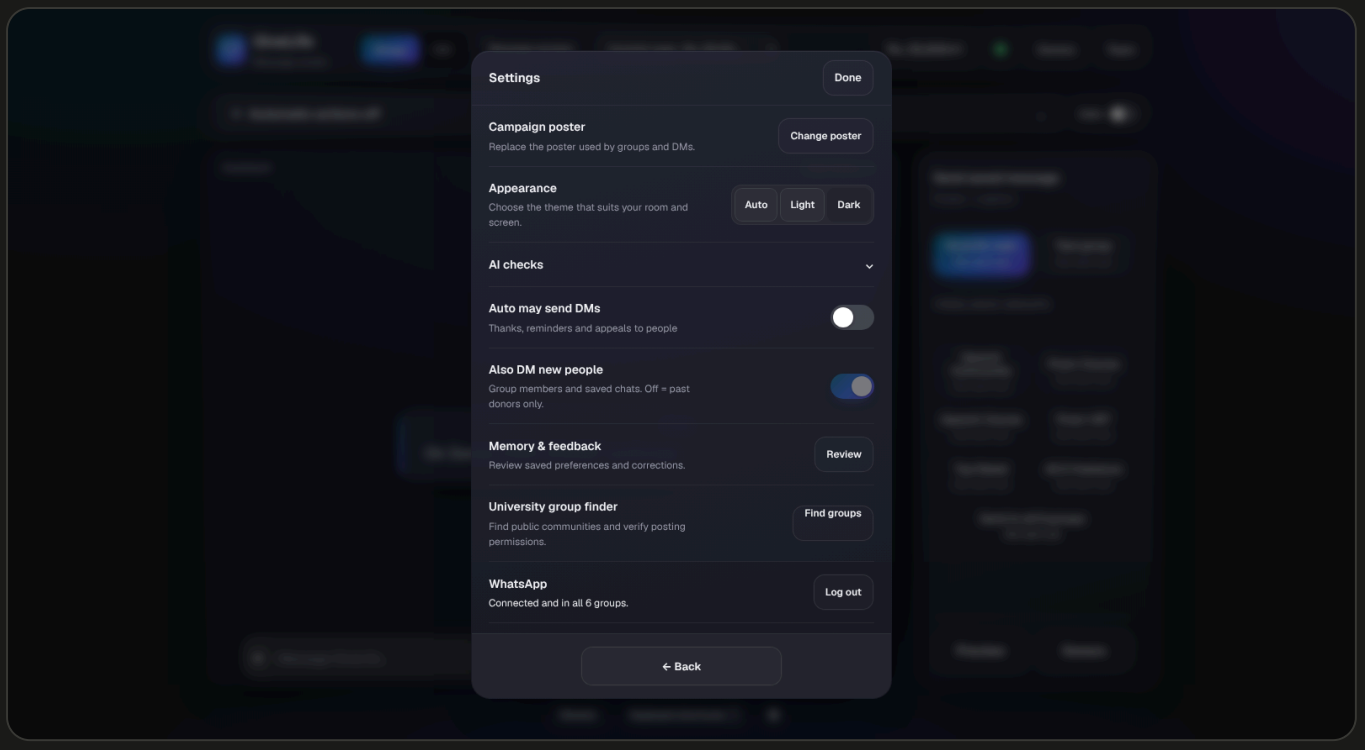

Connected and ready.

- **Connected** (green dot) — nothing to do.
- **Needs reconnecting** — tap Reconnect, no scanning needed.
- **Never connected** — tap for a QR code, then scan it from WhatsApp → Linked devices.

The poster — the image sent with every message — is changed in **Settings → Campaign poster**.

13 Settings

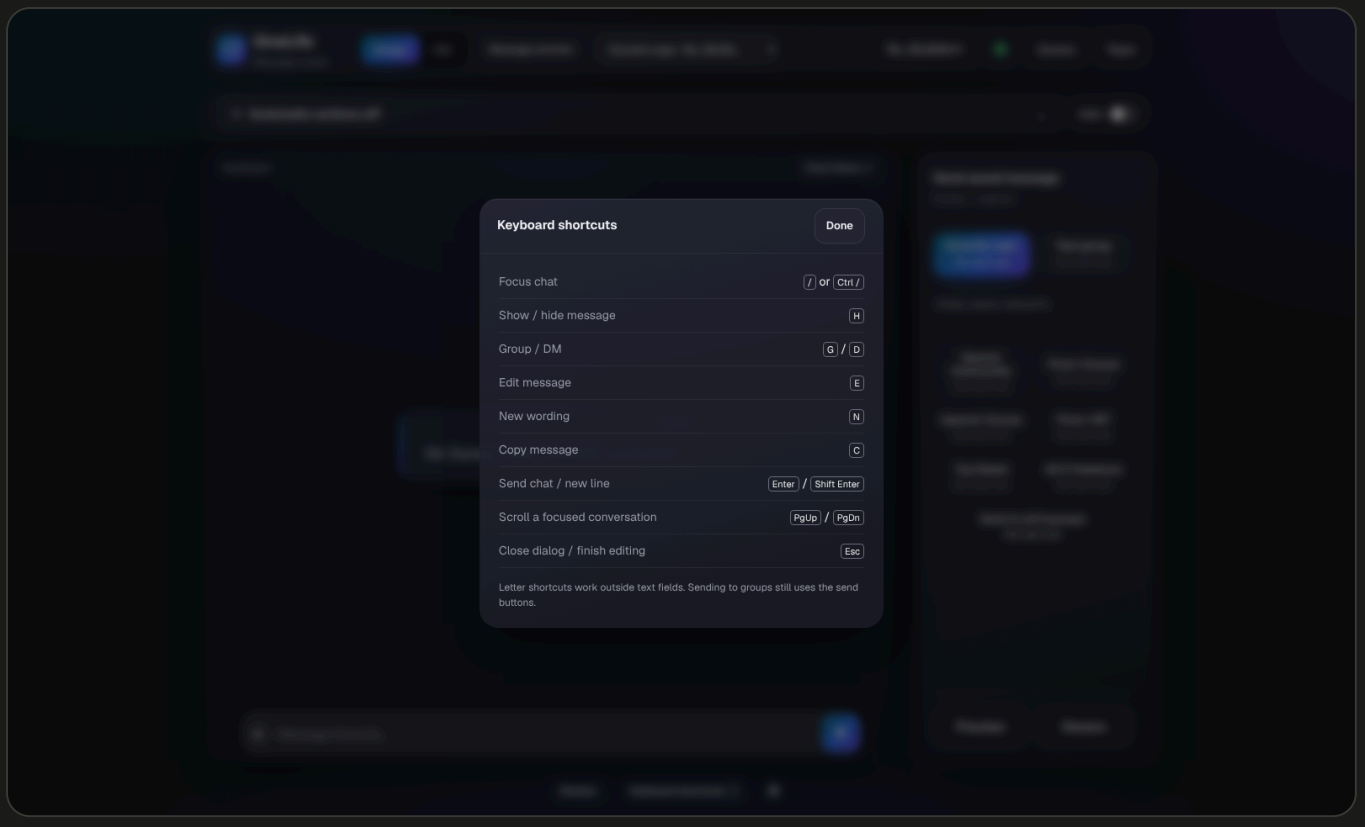

Tap the gear icon to open Settings.

SETTING	WHAT IT'S FOR
Campaign poster	Change the image sent with every message.
Appearance	Light, dark, or match the device.
AI model	Shows the chat assistant is connected and working.
Auto may send DMs	Lets Auto send DMs too, not just group posts.
Also DM new people	DMs group members too, not just past donors.
Memory & feedback	What the assistant has learned about how you like things done.
WhatsApp → Log out	Disconnects this number — only needed to switch numbers.

14 Keyboard shortcuts

On desktop, these work outside a text box.

They're off while you're typing, so they never get in the way.

15 A few tips

1. **Send a fresh message each time.**
   Tap New (or ask the assistant) before repeating a send — a new message each time reads better than the same one over and over.

2. **A quick glance before you send.**
   Check the amount and payment number look right — same as checking any message before sending it.

3. **Marking "Donated" is just a note.**
   It doesn't change the amount left by itself — update that separately, e.g. "came 2000".

4. **Not sure? Just ask.**
   A plain question to the assistant never sends anything — it's always safe to ask first.

5. **Need to pause everything?**
   Type `hold everything` and it all stops until you say resume.

16 Quick reference

One page to keep open while you work.

Send the case message

Message preview → check it → tap a group (or Send to all). For one person: DM → number → Send DM with poster.

Write a fresh version

Tap **New**, or **Edit** it yourself, or tell the assistant what to change.

Update money

Tap **Rs. … left**, or type `25k left` / `came 2000`.

Message many donors

Donors → tab → **DM ★ Important** / **DM all**. Not saved yet: **DM in bulk**.

Pause everything

Type `hold everything`.

Let it run itself

Turn **Auto** on. Turn it off any time to stop.
